

## FLEXIBLE HEATER DUCTING

### FEATURES & BENEFITS

- High quality, low cost solution for heat transmission
- 30% lighter than canvas with triple the tear, puncture and tensile resistance
- No sharp scent
- Reinforced with internal coiled wire helix to improve flexibility and avoid collapse
- Silicone fabric liner on inlet end withstands up to 500°F
- Standard end finish includes a flexible steel Pinlock coupling (edges deburred for safety)
- Two webbing straps attached for secure storage and transport

### SPECIFICATIONS

STANDARD CONFIGURATION	12" x 12' (305mm x 3.7m), 16"x25' (406mm x 7.6m), 20.5"x25' (521mm x 7.6m)
STANDARD COLOUR	Yellow
TEMPERATURE RATING	-30°C - 260°C
END FINISH OPTIONS	Pinlock or J-lock
FABRIC	Polyester reinforced fabric with urethane topcoat and a high-heat Silicone (500°F) fabric starter section. Both are flame resistant.

 (844) 732-9466
